OBJECTIVE

A motivated and detail-oriented Computer Engineering Diploma holder seeking an entry-level position to apply my strong technical knowledge, problem-solving abilities. Eager to contribute to the success of the team and grow professionally by learning new skills and gaining hands-on experience in software development.

EDUCATION

Mern, Unique Occassio Tech Expected 2025

Diploma in Computer Engineering, GPTC Cherthala 2021 - 2024

Higher secondary education, DVHSS 2019 - 2021

SKILLS

JavaScript

Python

React JS

Tailwind CSS

Node JS

MongoDB

mySQL

PROJECTS

Todo-list. To-Do List application is a responsive, user-friendly web app developed using React and Tailwind CSS. This project allows users to easily add, edit, update, and delete tasks, helping them stay organized and manage their daily activities efficiently. The app features a clean and intuitive interface, with real-time updates to the task list, ensuring smooth user interactions. Tailwind CSS was used to create a responsive design that adapts seamlessly across various screen sizes, while React's component-based structure enables efficient rendering and state management. This project enhanced my skills in front-end development, state management with React, and responsive design using Tailwind CSS. ([live link](#)) ([git hub link](#))

Restaurant food management. The Restaurant Food Management System is a web-based application developed using Python and Django to streamline the management of food menus, orders, and customer interactions for restaurants. The system allows restaurant staff to easily add, update, and delete menu items. It also includes features like customer registration, order history, and the ability to view available items in the menu. The application uses Django's powerful backend capabilities for data handling and security, while providing an intuitive user interface for both customers and restaurant staff. This project enhanced my skills in full-stack development, database management, while providing an efficient solution to manage restaurant operations. ([git hub link](#))
